Introduction

The revised edition of *Click Start: Computer Science for Schools* is designed around the latest developments in the field of computer science, information and communication technology. Based on Windows 7 and MS Office 2010, with extensive updates on Windows 10 and MS Office 2016, the series aids the understanding of the essentials of computer science including computer basics, office applications, creative software, programming concepts and programming languages.

Each level of the series has been designed keeping in mind the mental aptitude and learning ability of the learners as well as their interests. Efforts have been made to use examples from day-to-day life, which will help the learners to bridge the gap between the knowledge of the subject and the real world. The books are designed to offer a holistic approach and help in the overall development of the learners.

KEY FEATURES

- **Snap Recap:** Probing questions to begin a chapter and assess pre-knowledge
- **Learning Objectives:** List of the learning outcomes of the chapter
- **Activity:** Interactive exercise after every major topic to reinforce analytical skills and application-based learning
- **Exercise:** A variety of questions to test conceptual clarity
- **Fact File:** Interesting concept-related snippets to augment concept knowledge
- **Quick Key and Try This:** Shortcuts and useful tips on options available for different operations
- **Glossary:** Chapter-end list of important terms along with their definitions
- **You Are Here:** Summary to aid quick recapitulation
- **Lab Work:** Practical exercises to enable application of concepts through learning-by-doing
- **Project Work:** Situational tasks to test practical application of the concepts learnt
- **Who Am I?:** Biographies to inspire young learners
- **Sample Paper:** Helps in preparing for cyber concepts and knowledge competition
- **Poster:** Informative infographics to help students stay safe in connected digital environment
